

BACKUP EVOLVED; LEGACY MAINTAINED

Discover Harbor's Historical Restore Service and move forward without being held back by existing backup infrastructure.

As digital transformation continues to prevail and disruptor services and technologies continue to be introduced, there are some exciting new backup solutions on the market that organisations may want to explore. But what to do with all that existing data and backup infrastructure.

Most organisations need to retain their backup data for compliance reasons and depending on the nature of their business or sector, this can be for a number of years. Managing and maintaining this historical data can present a huge hurdle for those looking to modernise their data protection strategy.

Aside from the cost of sustaining existing hardware, software and other backup infrastructure, there are also the overheads of support and retaining skillsets. Things can get expensive quickly – and complicated too. But we're here to remove that burden.

INTRODUCING HARBOR'S HISTORICAL RESTORE SERVICE

Harbor's Historical Restore Service takes away the headaches of managing and maintaining legacy backup data. The service is almost like an insurance policy – our customers can rely on it to not only comply with regulations, but also ensure that historical data can be recalled and restored whenever it's needed.

Delivered either as part of an end-to-end managed backup service where we take care of the entire process, or as a

standalone restore service, our offering means that nothing can hold customers back from taking their business forward.

No more maintaining backup servers, tape libraries and ageing infrastructure. No more overheads. No more stress. Our unrivalled expertise, countless years of experience in data backup, and deep knowledge of older systems means we're able to meet almost any legacy backup restore requirement.

HOW IT WORKS

Our offering is truly unique. Many vendors and service providers may promise to deliver the benefits of a new backup solution, but Harbor has the expertise and knowledge to do that while also taking care of the legacy restore requirement. **How our service works:**

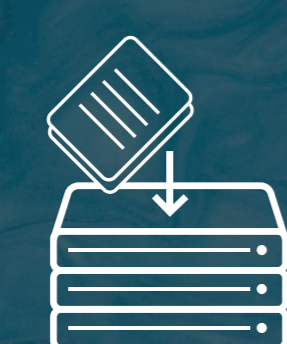

01

Harbor will ingest the backup catalogs for the legacy backup software into their systems.

02

Harbor will host and provide ongoing management of the catalogs to facilitate recovery from the storage. We can also store the storage media to improve the end-to-end process of recovery.

03

It is best practice to carry out a POC of the restore service to be able to prove the service process is working. Test restores can also be conducted for the relevant data types.

04

The data restore process will be initiated by you into the Harbor support desk. We will then search the catalogs and identify the tapes for recall – those tapes will then be scanned and the required data will be extracted from them.

05

Extracted data will be returned to you via either an encrypted USB or uploaded to a secure ftp site.

Harbor can offer various types of legacy restore services which include recovery from disk and cloud, as well as mothballing and managing small legacy backup systems.

WHY HARBOR SOLUTIONS?

01

Our services are relevant for commercial and public sector organisations of all sizes, from all sectors. But rather than taking a one-size-fits-all approach, we ask the right questions to deliver the right outcomes.

02

We have a wealth of experience and expertise in protecting data – no matter where it resides.

03

Our approach is focused solely on the customer's needs and on delivering the right combination of flexible, scalable technologies to meet them.

04

We help customers proactively understand the data they have, the value it holds and what needs to be done to protect it.

05

We are one of the largest operational backup and disaster recovery teams in Europe, supporting customers at an administration and user level, rather than just a sales level.

06

We offer a 24/7 platform that has financially backed SLAs – meaning around the clock operational excellence on your data, providing you complete reassurance.

07

We offer flexible commercial options across our services.

IT'S TIME TO FIND OUT MORE
